

PHSA 10041

Emergency Nurse Pediatric Course Two-day Provider Course

This course was developed by the Emergency Nurses' Association to enable nurses to increase their knowledge about prevention strategies for injury and disease, as well as triage assessment, nursing assessment and appropriate interventions for the child requiring emergency care. The information presented is intended to increase the cognitive, as well as the technical skills necessary to care for the child in the emergency care setting of a large trauma center or small rural clinic. Participants must pass a written exam and psychomotor skill station testing.

Director: Cary Van Dyke, RN, BSN, National Faculty

Who May Attend?

Registered Nurses. **LPNs, EMTs, PAs, and Paramedics may attend on a space-available basis, but are not eligible for Provider status.**

Coordinator: Mary Davis, RN, Education Coordinator
Providence Alaska Learning Institute (907) 212-3011

Credit: Nursing contact hours will be awarded by the Emergency Nurses' Association.

Registration: Early registration is encouraged as class size is limited. There is no registration fee for PH&SA employees or Travelers from departments where ENPC is mandatory. The fee for employees from non-mandatory areas and Providence medical staff practitioners is \$525.00. The fee for non-employees is \$575.00.

Course materials are received approximately four to six weeks prior to each course date. Registrants will be notified when the materials may be picked up from Providence Alaska Learning Institute. If you live outside the Anchorage area, materials will be mailed to you.

The Emergency Nurses' Association only provides materials for course registrants. If you are unable to attend a course, please return your textbook as soon as possible.
