

# TeleStroke provides rapid neurology expertise for patients experiencing a stroke.

## CHALLENGE

Scarce in-person vascular neurology resources impact patient care - when minutes matter.

## SOLUTION

The 24/7 Acute TeleStroke team is integrated with your staff through a unique implementation and program management approach. One call connects your hospital to a stroke trained Board Certified Neurologist. They expertly assess the patient, review imaging, and discuss treatment options.

We support sites in variety of settings: from acute care, rural access hospitals, to large urban medical centers.

### QUALITY

Faster stroke care for better outcomes.

- 14% thrombolytics delivery rate.
- Providence Board Certified neurologists provide onsite and virtual care.
- 17 years' experience serving patients and on-site staff.

### ACCESS

Rapid connection to a Board Certified Neurologist. Consulting at small critical access to large urban hospitals.

- 2.4-minute response time.
- Works with facilities to meet door-to-needle and door-to-device metrics.
- 90+ live sites.
- 12 thrombectomy centers.

### VALUE

Patients can be cared for at a lower cost facility.

- 70% of calls are low-acuity stroke rule-outs, and filters high acuity patients appropriately.
- Patients receiving thrombolytics before transfer decrease costs (\$11.5M CM)
- 71% of stroke malpractice lawsuits due to failure to diagnose and treat with thrombolytics. Average plaintiff verdict is \$9.7M.

### EXPERIENCE

Sites and families feel supported.

- Access to data dashboards and quality reviews
- 99% of current customers agree TS has improved their patients' access to quality care.
- 12K+ unique patients served each year.
